Don't change what is good! Old labs for a new training"

Mariana Landin

Universidad de Santiago de Compostela Campus Vida. 15782 Santiago de Compostela Spain

Bologna Declaration (June 1999)

Objective:

"To promote more and better

further and higher education

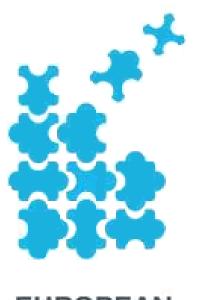

to empower all student

with knowledge and skills

for their future"

How to develop a coherent and cohesive European Higher Education Area (EHEA)?

EUROPEAN
Higher Education Area

Based on three principles:

- Two main cycles system (grade and master)
- European Credit Transfer System (ECTS)
- Teaching Quality Assurance

Pharmacy curricula in Spain

☑ ECTS

⊠Two main cycles system (grade and master)

5 year degree

Teaching Quality Assurance

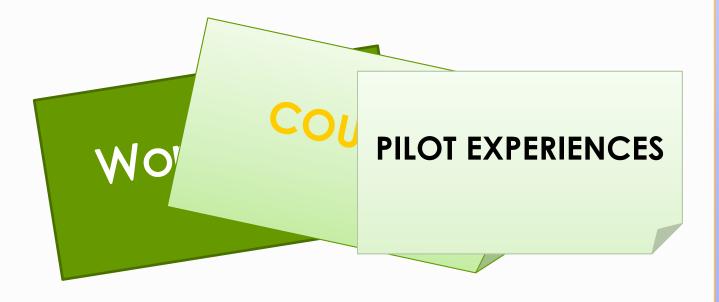

QUALITY ASSURANCE

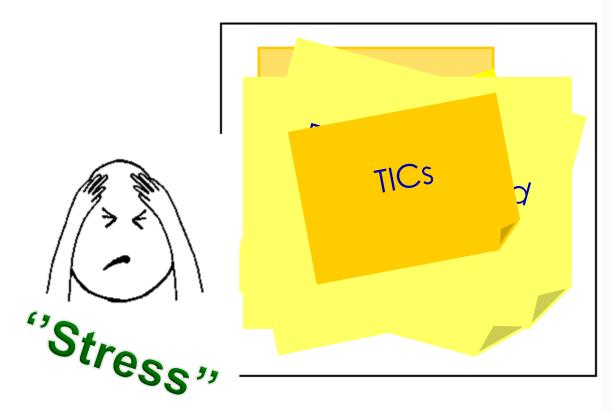

YOU ARE NOT GOOD TEACHERS!

YOU HAVE TO LEARN FROM EUROPE!

After all that courses...

Some people travel to Europe

Some big differences

- Flexibility
 - Practical orientation (different degrees or masters)
- Organization
- Coordination
- Communication
- Much more demanding for the students, who had the responsibility of their own learning...

Traditional system weaknesses

- Excess of lecturing
- Learning and EVALUATION centered on knowledge not on skills
- Lack in coordination between subjects

Traditional system strengths

- Experienced teachers
- Scientific basis centered system
- Facilities for practical labs and teaching skills

Pharmacy curricula of XXI century

- New role and responsibilities of community and hospital pharmacy.
- Skills to adap to rapid changes in pharmaceutical industry

Pharmaceutical Technology mission

- Design and formulation of dosage forms and their quality control
- Knowledge and skills about (compulsory)
 Good Manufacturing Practice
- Reading and interpretation of official regulations, pharmacopoeias and SOPs
- Habits and skills on hygiene and security at work and manipulation of pharmaceutical materials and products

Old labs transformation

"Change some aspects but...

not all"

Our PHARMACEUTICAL COMPANY

Equipment and product dentification

PRODUCTION

QUALITY CONTROL

Physical segregation

Balances area Capsules

Wet granulation Capsule testers

Tablet testers

Analytical metho validation

Personnel responsibilities distribution

Production & Security

Quality Control Storage & weighting

Production steps for capsules

Pharmaceutical calculations

Raw materials storage

Weighting

Powder mixing

Encapsulating

Unit operations: weighting, mixing, filling...

Written procedures: company formulas, general SOPs

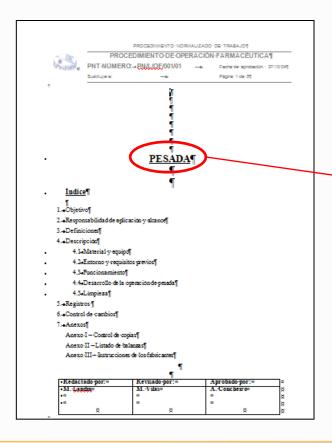

Labeling: identification in process

Cleaning: equipment

Signature: independently verified

real formulation and real production rules

General SOP's following
Spanish National Formulary

Weighting

Production steps for tablets

Pharmaceutical calculations

Raw materials storage

Weighting

Wet massing

Wet granulation

tabletting

Unit operations

Powder mixing

drying

Production steps for tablets

Unit operations: weighting, mixing, wet granulation...

Written procedures: company formulas, general SOPs

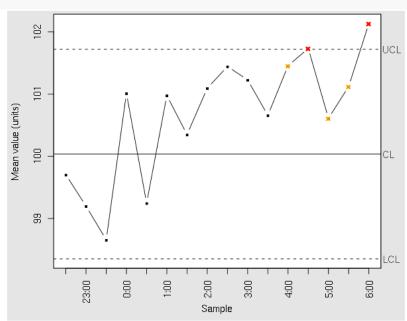

Labeling: identification in process

Cleaning: equipment

Signature: independently v

Control in process:

control chart

Quality control department

- Validation of Analytical Procedures
 ICH Topic Q 2
 - Accuracy
 - Precision
 - Repeatability
 - Linearity

Quality Control tests for tablets and capsules

- Spanish pharmacopoeia
- US Pharmacopoeia
 - Test selection
 - Tests SOP's
 - Lot Certificate
