QUALITY ASSURANCE IN PHARMACY

“The qualification frameworks (Bologna Working Group, 2005) and the following emphasis on students’ learning outcomes (OECD, 2009) in higher education organizations are based on the instrumental ideas to **enhance transparency**, develop **quality** and create more **efficient** organizations. This standardization of reports and the new evaluation-strategies imposed into these academic institutions build on managerial logics from the business world. These reforms create dilemmas.....”

Pettersen IJ. From metrics to knowledge? Quality assessment in higher education. *Financial Accountability and Management* 2015; 31: 23-40.
