

INTRODUCTION

Under new leadership of FIP CEO Catherine Duggan and President Dominique Jordan, FIP has developed a renewed vision, mission, strategic plan and FIP Development Goals. Under the moniker “One FIP,” FIP is the only international organization that combines science, education and practice altogether.

This presentation describes partnerships that FIP has been establishing in order to progress ONE FIP agenda and priorities, particularly for pharmaceutical education.

METHOD

One FIP and FIP Development Goals

- The “One FIP” strategy is to unite pharmaceutical sciences, practice and education to achieve one common goal of improving global health that defines FIP’s mission
- The FIP Development Goals define the areas of emphasis for FIP in developing a global pharmacy workforce in the sciences, practice and education sectors working together to achieve this goal

Partnerships

To solidify its unique role, FIP is creating close partnerships with WHO, UN (UNESCO), WHPA, Bill and Melinda Gates Foundation and World Bank to champion universal health coverage and primary health care. To broaden its global impact, FIP embarked in 2019 on regional conferences with member organizations, first in Amman Jordan for the EMR and a second in Ankara Turkey for the European Region with additional conferences scheduled in 2020 now postponed to 2021.

Recognizing the ever-growing impact of technology on pharmacy and healthcare, FIP established a new Technology Forum and the now 2021 Seville Congress specifically addresses the Technological Revolution and its Impact on Pharmacy and Health Care.

RESULTS (cont’d)

A virtual GALF was presented at FIP Virtual 2020 in September on “Enhancing academic leadership horizons in trying times” to navigate COVID-19 and similar crises in pharmaceutical education. This program was the first of four parts to an abbreviated version of the GALFP leadership course offering an online program to current and future academic leaders. The full leadership course will be re-launched in 2021⁴.

Virtual GALF 2020

- Programme**
1. Launch of the “Enhancing Academic Leadership Horizons in Trying Times” – Lucinda Maine & Catherine Duggan
 2. Leadership Models Applicable in Trying Times – Pierre Moreau
 3. Developing and Implementing Change in the Light of a Crisis – Tina Brock

Technology

Another result from the Ankara conference was the importance of developing technology enabled pharmaceutical workforce. EAFP joined FIP’s core team on Digital Health in pharmacy education and developed a global survey to identify responsiveness and readiness of pharmacy education in delivering digital health education.

AIM/S

There are many new initiatives underway at FIP, too many to report in this poster. We focused on three main areas:

1- Describe (i) ONE FIP strategy¹ and (ii) ONE FIP Development Goals²

2-Outline global, regional level partnerships that FIP has been delivering and their preliminary outcomes

3-Showcase a new FIP AIM AACP partnership program for academic leadership

RESULTS

Regional Partnership - Europe

FIP published in 2019 the Ankara commitment to action on primary care health needs identified in the European Region. Results of the level of implementation and gap analysis based on the Ankara commitment was published in the FIP Regional Conference for the European Region Report 2020³. EAFP contributed to a pharmacy education session in Ankara that empowers graduates to unite science with practice to advance pharmaceutical services and to this report to bring a focus on education needs towards building strengthened primary health care provision by pharmacists in the region.

FIP AIM AACP Partnership Program

A new initiative was launched this year to promote leadership development in academia. FIP AIM together with AACP established the Global Academic Leadership Fellowship Program (GALFP) to develop emerging academic leaders. Due to COVID-19 pandemic, FIP 2020 Seville Congress, the Global Academic Leaders Forum (GALF) and the GALFP have been postponed to 2021.

CONCLUSION

Through establishing these collaborative networks and partnerships and uniting science, practice and education, FIP is an international driving force to achieve better outcomes and greater impact on narrowing the gaps between different regions of the world to advance pharmacy worldwide and improve global health.
